SET-1

प्रश्न-पत्र कोड

Q.P. Code

55/3/1

रोल नं.

Roll No.

--	--	--	--	--	--	--	--

परीक्षार्थी प्रश्न-पत्र कोड को उत्तर-पुस्तिका के मुख-पृष्ठ पर अवश्य लिखें।

Candidates must write the Q.P. Code on the title page of the answer-book.

नोट

- (I) कृपया जाँच कर लें कि इस प्रश्न-पत्र में मुद्रित पृष्ठ 12 हैं।
- (II) प्रश्न-पत्र में दाहिने हाथ की ओर दिए गए प्रश्न-पत्र कोड को छात्र उत्तर-पुस्तिका के मुख-पृष्ठ पर लिखें।
- (III) कृपया जाँच कर लें कि इस प्रश्न-पत्र में 12 प्रश्न हैं।
- (IV) कृपया प्रश्न का उत्तर लिखना शुरू करने से पहले, प्रश्न का क्रमांक अवश्य लिखें।
- (V) इस प्रश्न-पत्र को पढ़ने के लिए 15 मिनट का समय दिया गया है। प्रश्न-पत्र का वितरण पूर्वाह्न में 10.15 बजे किया जाएगा। 10.15 बजे से 10.30 बजे तक छात्र केवल प्रश्न-पत्र को पढ़ेंगे और इस अवधि के दौरान वे उत्तर-पुस्तिका पर कोई उत्तर नहीं लिखेंगे।

NOTE

- (I) Please check that this question paper contains 12 printed pages.
- (II) Q.P. Code given on the right hand side of the question paper should be written on the title page of the answer-book by the candidate.
- (III) Please check that this question paper contains 12 questions.
- (IV) Please write down the Serial Number of the question in the answer-book before attempting it.
- (V) 15 minute time has been allotted to read this question paper. The question paper will be distributed at 10.15 a.m. From 10.15 a.m. to 10.30 a.m., the candidates will read the question paper only and will not write any answer on the answer-book during this period. *

सामान्य निर्देश :

निम्नलिखित निर्देशों को बहुत सावधानी से पढ़िए और उनका पालन कीजिए :

- (i) इस प्रश्न-पत्र में कुल 12 प्रश्न हैं। सभी प्रश्न अनिवार्य हैं।
- (ii) यह प्रश्न पत्र तीन खंडों में विभाजित है – खंड क, ख और ग।
- (iii) खण्ड-क : प्रश्न संख्या 1 से 3 तक प्रत्येक प्रश्न 2 अंक का है।
- (iv) खण्ड-ख : प्रश्न संख्या 4 से 11 तक प्रत्येक प्रश्न 3 अंक का है।
- (v) खण्ड-ग : प्रश्न संख्या 12 प्रकरण अध्ययन आधारित प्रश्न है, यह प्रश्न 5 अंक का है।
- (vi) प्रश्न पत्र में कोई समग्र विकल्प नहीं है। हालाँकि कुछ प्रश्नों में आंतरिक विकल्प प्रदान किए गए हैं। इनमें से केवल एक ही प्रश्न का उत्तर लिखिए।
- (vii) लॉग टेबल का उपयोग कर सकते हैं, यदि आवश्यक हो, लेकिन कैल्कुलेटर के उपयोग की अनुमति नहीं है।

$$c = 3 \times 10^8 \text{ m/s}$$

$$h = 6.63 \times 10^{-34} \text{ Js}$$

$$e = 1.6 \times 10^{-19} \text{ C}$$

$$\mu_0 = 4\pi \times 10^{-7} \text{ T m A}^{-1}$$

$$\epsilon_0 = 8.854 \times 10^{-12} \text{ C}^2 \text{ N}^{-1} \text{ m}^{-2}$$

$$\frac{1}{4\pi\epsilon_0} = 9 \times 10^9 \text{ N m}^2 \text{ C}^{-2}$$

$$\text{इलेक्ट्रॉन का द्रव्यमान (m}_e\text{)} = 9.1 \times 10^{-31} \text{ kg}$$

$$\text{न्यूट्रॉन का द्रव्यमान} = 1.675 \times 10^{-27} \text{ kg}$$

$$\text{प्रोटॉन का द्रव्यमान} = 1.673 \times 10^{-27} \text{ kg}$$

$$\text{आवोगाद्रो संख्या} = 6.023 \times 10^{23} \text{ प्रति ग्राम मोल}$$

$$\text{बोल्डज़मान नियतांक} = 1.38 \times 10^{-23} \text{ JK}^{-1}$$

General Instructions :

Read the following instructions very carefully and strictly follow them :

- (i) *This question paper contains 12 questions. All questions are compulsory.*
- (ii) *This question paper is divided into three sections – Section A, B and C.*
- (iii) **Section A : Q. Nos. 1 to 3 are of 2 marks each.**
- (iv) **Section B : Q. Nos. 4 to 11 are of 3 marks each.**
- (v) **Section C : Q. No. 12 is a case study based questions of 5 marks.**
- (vi) *There is no overall choice in the question paper. However, internal choice has been provided in some of the questions. Attempt any one of the alternatives in such questions.*
- (vii) *Use of log tables is permitted, if necessary, but use of calculator is not permitted.*

$$c = 3 \times 10^8 \text{ m/s}$$

$$h = 6.63 \times 10^{-34} \text{ Js}$$

$$e = 1.6 \times 10^{-19} \text{ C}$$

$$\mu_0 = 4\pi \times 10^{-7} \text{ T m A}^{-1}$$

$$\epsilon_0 = 8.854 \times 10^{-12} \text{ C}^2 \text{ N}^{-1} \text{ m}^{-2}$$

$$\frac{1}{4\pi\epsilon_0} = 9 \times 10^9 \text{ N m}^2 \text{ C}^{-2}$$

$$\text{Mass of electron (} m_e \text{)} = 9.1 \times 10^{-31} \text{ kg}$$

$$\text{Mass of neutron} = 1.675 \times 10^{-27} \text{ kg}$$

$$\text{Mass of proton} = 1.673 \times 10^{-27} \text{ kg}$$

$$\text{Avogadro's number} = 6.023 \times 10^{23} \text{ per gram mole}$$

$$\text{Boltzmann constant} = 1.38 \times 10^{-23} \text{ JK}^{-1}$$

खण्ड – क

1. नैज अर्धचालक के मादन से क्या तात्पर्य है ? Ge/Si के मादन के लिए उपयोग किए जाने वाले परमाणुओं के दो प्रकारों का नाम लिखिए । 2
2. (a) (i) समस्थानिकों और समभारिकों के बीच विभेदन कीजिए । 2
(ii) दो नाभिकों के विभिन्न परमाणु द्रव्यमान A_1 और A_2 हैं । क्या ये नाभिक आवश्यक रूप से समान तत्व के समस्थानिक हैं ? व्याख्या कीजिए ।

अथवा

(b) (i) उन कारकों का नाम लिखिए जिन पर किसी पृष्ठ से प्रकाश-विद्युत उत्सर्जन निर्भर करता है ।
(ii) किसी प्रकाश सुग्राही पदार्थ के लिए देहली आवृत्ति की परिभाषा लिखिए ।
3. किसी p-n संधि में रोधिका विभव बनने की व्याख्या कीजिए । 2

खण्ड – ख

4. किसी हाइड्रोजन परमाणु में स्थायी कक्षाओं की व्याख्या के लिए बोर के अभिगृहीत का उल्लेख कीजिए । यह सत्यापित कीजिए कि n वीं कक्षा में परिक्रमा करने वाले किसी इलेक्ट्रॉन की चाल $(1/n)$ के आनुपातिक होती है । 3
5. संक्षेप में व्याख्या कीजिए कि किसी सौर सेल में emf किस प्रकार उत्पन्न होती है । इसके लिए I-V अभिलाक्षणिक आरेखित कीजिए । 3
6. कोई प्रोटॉनों का पतला प्रकाश पुंज जिसमें प्रत्येक प्रोटॉन की ऊर्जा 4.1 MeV है लैड ($Z = 82$) की किसी चादर की ओर उपगमन कर रहा है । परिकलित कीजिए :
(i) पुंज में किसी प्रोटॉन की चाल, और
(ii) उसके उपगमन की समीपस्थ दूरी 3
7. किसी एकल झिरी के विवर्तन पैटर्न में केन्द्रीय उच्चिष्ठ की कोणीय चौड़ाई में किस प्रकार का परिवर्तन होगा, यदि
(i) हरे प्रकाश के स्थान पर नारंगी प्रकाश का उपयोग किया जाए,
(ii) पर्दे को झिरी के निकट लाया जाए, और
(iii) झिरी की चौड़ाई कम कर दी जाए ?
प्रत्येक प्रकरण में अपने उत्तर की पुष्टि कीजिए । 3

SECTION-A

1. What is meant by doping of an intrinsic semiconductor ? Name the two types of atoms used for doping of Ge/Si. 2

2. (a) (i) Distinguish between isotopes and isobars. 2
(ii) Two nuclei have different mass numbers A_1 and A_2 . Are these nuclei necessarily the isotopes of the same element ? Explain.

OR

- (b) (i) Name the factors on which photoelectric emission from a surface depends.
(ii) Define the term 'threshold frequency' for a photosensitive material.

3. Explain the formation of the barrier potential in a p-n junction. 2

SECTION-B

4. State Bohr's postulate to explain stable orbits in a hydrogen atom. Prove that the speed with which the electron revolves in n^{th} orbit is proportional to $(1/n)$. 3

5. Briefly explain how emf is generated in a solar cell. Draw its I-V characteristics. 3

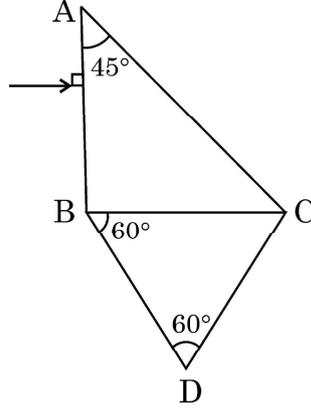

6. A narrow beam of protons, each having 4.1 MeV energy is approaching a sheet of lead ($Z = 82$). Calculate :
(i) the speed of a proton in the beam, and
(ii) the distance of its closest approach 3

7. In a diffraction pattern due to a single slit, how will the angular width of central maximum change, if
(i) Orange light is used in place of green light,
(ii) the screen is moved closer to the slit,
(iii) the slit width is decreased ?
Justify your answer in each case. 3

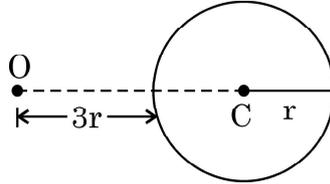

8. (a) पूर्ण आन्तरिक परावर्तन के लिए दो आवश्यक शर्तें लिखिए ।
(b) आरेख में दर्शाए अनुसार दो प्रिज्मों ABC और DBC को व्यवस्थित किया गया है । वायु के सापेक्ष इन दोनों प्रिज्मों के क्रांतिक कोण क्रमशः 41.1° और 45° हैं । प्रिज्मों के संयोजन से प्रकाश किरण के पथ को आरेखित कीजिए ।

3

अथवा

- (a) कोई बिम्ब किसी अभिसारी लेंस के सामने स्थित है । वह शर्तें प्राप्त कीजिए जिसमें इस लेंस द्वारा उत्पन्न आवर्धन (i) ऋणात्मक और (ii) धनात्मक होता है ।
(b) कोई बिन्दुकित बिम्ब किसी काँच के गोले के सामने आरेख में दर्शाए अनुसार O पर स्थित है । इस गोले द्वारा प्रतिबिम्ब बनना दर्शाइए ।

9. किसी इलेक्ट्रॉन को विश्राम से 100 V विभवान्तर से होकर त्वरित किया गया है ।

- (i) इलेक्ट्रॉन से संबद्ध तरंगदैर्घ्य,
(ii) इलेक्ट्रॉन का संवेग और
(iii) इलेक्ट्रॉन द्वारा अर्जित वेग ज्ञात कीजिए ।

3

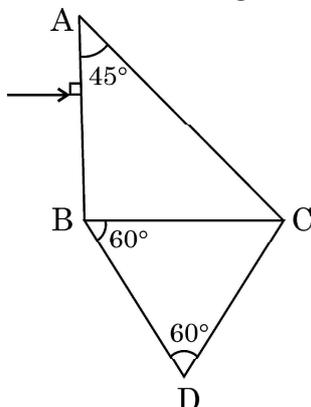

10. यंग के किसी द्वि-झिरी प्रयोग में, जिसमें 600 nm तरंगदैर्घ्य के प्रकाश का उपयोग किया गया है, झिरीयों के बीच पृथकन 0.8 mm है और पर्दे को झिरीयों के तल से 1.6 m की दूरी पर रखा गया है ।

- (i) फ्रिन्ज चौड़ाई, और
(ii) केन्द्रीय उच्चिष्ठ से (a) तीसरे निम्निष्ठ और (b) पाँचवें उच्चिष्ठ की दूरी परिकलित कीजिए ।

3

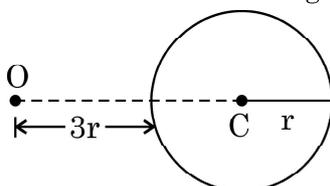

8. (a) Write two necessary conditions for total internal reflection.
(b) Two prisms ABC and DBC are arranged as shown in figure.

The critical angles for the two prisms with respect to air are 41.1° and 45° respectively. Trace the path of the ray through the combination. **3**

OR

- (a) An object is placed in front of a converging lens. Obtain the conditions under which the magnification produced by the lens is (i) negative and (ii) positive.
(b) A point object is placed at O in front of a glass sphere as shown in figure.

Show the formation of image by the sphere.

9. An electron is accelerated from rest through a potential difference of 100 V. Find :
(i) the wavelength associated with
(ii) the momentum of and
(iii) the velocity required by, the electron. **3**
10. In a Young's double slit experiment using light of wavelength 600 nm, the slit separation is 0.8 mm and the screen is kept 1.6 m from the plane of the slits. Calculate :
(i) the fringe width
(ii) the distance of (a) third minimum and (b) fifth maximum, from the central maximum. **3**

11. (a) λ_1 , λ_2 और λ_3 तरंगदैर्घ्य की विद्युत-चुम्बकीय तरंगों का उपयोग क्रमशः रेडार निकायों में, जल शोधकों में और टीवी के सुदूर स्विचों में किया जाता है।
- (i) इन विद्युत-चुम्बकीय तरंगों को पहचानिए, तथा
- (ii) इनमें प्रत्येक के लिए एक-एक स्रोत लिखिए।

3

अथवा

- (b) (i) दो प्रकाश स्रोतों के कलासंबद्ध होने के लिए दो शर्तों का उल्लेख कीजिए।
- (ii) दो झिर्ियों के कारण उत्पन्न व्यतिकरण पैटर्न और एकल झिरी के कारण विवर्तन पैटर्न के बीच दो अन्तर लिखिए।

खण्ड – ग

प्रकरण अध्ययन

12. संयुक्त सूक्ष्मदर्शी दो अभिसारी लेंसों से मिलकर बनता है। जिनमें एक लेंस जिसका द्वारक छोटा और फोकस दूरी कम होती है उसे अभिदृश्यक कहते हैं तथा दूसरे लेंस को जिसका द्वारक कुछ बड़ा होता है और फोकस दूरी भी कुछ अधिक होती है उसे नेत्रिका कहते हैं। दोनों लेंसों को किसी नलिका में इस प्रकार व्यवस्थित किया जाता है कि इन दोनों लेंसों के बीच की दूरी को परिवर्तित किया जा सके। किसी लघु बिम्ब को अभिदृश्यक के सामने इसकी फोकस दूरी से कुछ अधिक दूरी पर रखा जाता है। अभिदृश्यक इस बिम्ब का प्रतिबिम्ब बनाता है, जो नेत्रिका के लिए बिम्ब की भांति कार्य करता है। नेत्रिका फिर बिम्ब का अंतिम आवर्धित प्रतिबिम्ब बना देती है।

$1 \times 5 = 5$

- I. किसी संयुक्त सूक्ष्मदर्शी में अभिदृश्यक और नेत्रिका द्वारा बनाए गए प्रतिबिम्ब होते हैं क्रमशः

- (A) आभासी, वास्तविक (B) वास्तविक, आभासी
(C) आभासी, आभासी (D) वास्तविक, वास्तविक

- II. किसी संयुक्त सूक्ष्मदर्शी के कारण आवर्धन निम्नलिखित में से किस पर निर्भर नहीं करता है ?

- (A) अभिदृश्यक और नेत्रिका के द्वारक
(B) अभिदृश्यक और नेत्रिका की फोकस दूरी
(C) नलिका की लम्बाई
(D) उपयोग किया गया प्रकाश

11. (a) Electromagnetic waves of wavelengths λ_1 , λ_2 and λ_3 are used in radar systems, in water purifiers and in remote switches of TV, respectively.
- (i) Identify the electromagnetic waves, and
- (ii) Write one source of each of them. 3

OR

- (b) (i) State two conditions for two light sources to be coherent.
- (ii) Give two points of difference between an interference pattern due to a double – slit and a diffraction pattern due to a single slit.

SECTION-C

CASE STUDY

12. A compound microscope consists of two converging lenses. One of them, of smaller aperture and smaller focal length is called objective and the other of slightly larger aperture and slightly larger focal length is called eye-piece. Both the lenses are fitted in a tube with an arrangement to vary the distance between them. A tiny object is placed in front of the objective at a distance slightly greater than its focal length. The objective produces the image of the object which acts as an object for the eye-piece. The eye piece, in turn produces the final magnified image. $1 \times 5 = 5$

- I. In a compound microscope the images formed by the objective and the eye-piece are respectively
- (A) virtual, real (B) real, virtual
- (C) virtual, virtual (D) real, real
- II. The magnification due to a compound microscope *does not* depend upon
- (A) the aperture of the objective and the eye-piece
- (B) the focal length of the objective and the eye-piece
- (C) the length of the tube
- (D) the colour of the light used

III. संयुक्त सूक्ष्मदर्शी के संदर्भ में कौन सा कथन *सही नहीं* है ?

- (A) दोनों लेंस कम फोकस दूरी के होते हैं ।
(B) दोनों लेंसों की फोकस दूरी कम करने पर आवर्धन क्षमता बढ़ जाती है ।
(C) दोनों लेंसों के बीच की फोकस दूरी ($f_o + f_e$) से अधिक होती है ।
(D) दोनों लेंसों की अदला-बदली करके इस सूक्ष्मदर्शी का उपयोग दूरदर्शक के रूप में किया जा सकता है ।

IV. किसी संयुक्त सूक्ष्मदर्शी में अभिदृश्यक 10X का और नेत्रिका 20X की है । इस सूक्ष्मदर्शी के कारण आवर्धन होगा

- (A) 2 (B) 10
(C) 30 (D) 200

V. किसी संयुक्त सूक्ष्मदर्शी के अभिदृश्यक और नेत्रिका की फोकस दूरियाँ क्रमशः 1.2 cm और 3.0 cm हैं । बिम्ब अभिदृश्यक से 1.25 cm दूरी पर स्थित है । यदि अन्तिम प्रतिबिम्ब अनन्त पर बनता है, तो सूक्ष्मदर्शी की आवर्धन क्षमता होगी

- (A) 100 (B) 150
(C) 200 (D) 250

- III. Which of the following is *not correct* in the context of a compound microscope ?
- (A) Both the lenses are of short focal lengths.
 - (B) The magnifying power increases by decreasing the focal lengths of the two lenses.
 - (C) The distance between the two lenses is more than $(f_o + f_e)$.
 - (D) The microscope can be used as a telescope by interchanging the two lenses.
- IV. A compound microscope consists of an objective of 10X and an eye-piece of 20X. The magnification due to the microscope would be
- (A) 2
 - (B) 10
 - (C) 30
 - (D) 200
- V. The focal lengths of objective and eye-piece of a compound microscope are 1.2 cm and 3.0 cm respectively. The object is placed at a distance of 1.25 cm from the objective. If the final image is formed at infinity, the magnifying power of the microscope would be
- (A) 100
 - (B) 150
 - (C) 200
 - (D) 250
-

Strictly Confidential: (For Internal and Restricted use only)

SeniorSecondary School ,Term II Examination2022

Marking Scheme – PHYSICS (SUBJECT CODE — 042)

(PAPER CODE — 55/3/1)

General Instructions: -

1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2. **“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under IPC.”**
3. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. **However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and marks be awarded to them. In class-X, while evaluating two competency based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, marks should be awarded.**
4. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
5. Evaluators will mark(\checkmark) wherever answer is correct. For wrong answer ‘X’ be marked. Evaluators will not put right kind of mark while evaluating which gives an impression that answer is correct and no marks are awarded. **This is most common mistake which evaluators are committing.**
6. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left-hand margin and encircled. This may be followed strictly.
7. If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
8. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
9. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
10. A full scale of marks 35 (example 0-40 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.

11. Every examiner has to necessarily do evaluation work for full working hours i.e. 8 hours every day and evaluate 30 answer books per day in main subjects and 35 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper
12. Ensure that you do not make the following common types of errors committed by the Examiner in the past:-
 - Leaving answer or part thereof un assessed in an answer book.
 - Giving more marks for an answer than assigned to it.
 - Wrong totalling of marks awarded on a reply.
 - Wrong transfer of marks from the inside pages of the answer book to the title page.
 - Wrong question wise totalling on the title page.
 - Wrong totalling of marks of the two columns on the title page.
 - Wrong grand total.
 - Marks in words and figures not tallying.
 - Wrong transfer of marks from the answer book to online award list.
 - Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
 - Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
13. While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
14. Any un assessed portion, non-carrying over of marks to the title page, or totalling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
15. The Examiners should acquaint themselves with the guidelines given in the Guidelines for spot Evaluation before starting the actual evaluation.
16. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.
17. The Board permits candidates to obtain photocopy of the Answer Book on request in an RTI application and also separately as a part of the re-evaluation process on payment of the processing charges.

Strictly Confidential: (For Internal and Restricted use only)

SeniorSecondary School ,Term II Examination2022

Marking Scheme – PHYSICS (SUBJECT CODE — 042)

(PAPER CODE — 55/3/2)

General Instructions: -

1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2. **“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under IPC.”**
3. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. **However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and marks be awarded to them. In class-X, while evaluating two competency based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, marks should be awarded.**
4. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
5. Evaluators will mark(\surd) wherever answer is correct. For wrong answer ‘X’ be marked. Evaluators will not put right kind of mark while evaluating which gives an impression that answer is correct and no marks are awarded. **This is most common mistake which evaluators are committing.**
6. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left-hand margin and encircled. This may be followed strictly.
7. If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
8. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
9. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.

10. A full scale of marks ____35 ____ (example 0-40 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
11. Every examiner has to necessarily do evaluation work for full working hours i.e. 8 hours every day and evaluate 30 answer books per day in main subjects and 35 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the .of questions in question paper reduced syllabus and number
12. Ensure that you do not make the following common types of errors committed by the Examiner in the past:-
 - Leaving answer or part thereof un assessed in an answer book.
 - Giving more marks for an answer than assigned to it.
 - Wrong totalling of marks awarded on a reply.
 - Wrong transfer of marks from the inside pages of the answer book to the title page.
 - Wrong question wise totalling on the title page.
 - Wrong totalling of marks of the two columns on the title page.
 - Wrong grand total.
 - Marks in words and figures not tallying.
 - Wrong transfer of marks from the answer book to online award list.
 - Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
 - Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
13. While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0)Marks.
14. Any un assessed portion, non-carrying over of marks to the title page, or totalling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
15. The Examiners should acquaint themselves with the guidelines given in the Guidelines for spot Evaluation before starting the actual evaluation.
16. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.
17. The Board permits candidates to obtain photocopy of the Answer Book on request in an RTI application and also separately as a part of the re-evaluation process on payment of the processing charges.
